

Dear Sir or Madam:

I have 4 XM radio subscriptions. Needless to say I like the product. I am shocked that our government administrators would consider limiting the programming that I receive in any way. The traffic and weather reports on XM are far better than any fm or am radio station. XM Radio is a clear demonstration of the potential for great programming and service that benefits its public. The people trying to limit XM have already turned their stations into a cookie cutter sameness that caused me to consider XM in the first place. Having ruined commercial terrestrial radio, you and these license holders who want to limit XM should be ashamed. Why don't you leave XM alone since they are providing a great public service and bother these AM and FM license holders who have ruined the stations that they represent. REJECT NAB's PETITION 04-160.
Glenn Cox
